

## Walking to School Safely

1. Students should always use sidewalks whenever they are available.
2. Students should always cross a street at a crosswalk.
3. Students should always obey traffic signals and/or traffic officers.
4. Students should always cross the street from a location where drivers can see them. They should never step out from between parked cars.
5. Students should always walk when they cross a street. If they run, they could trip and fall.

Students should always **STOP, LOOK** and **LISTEN** before they cross any street. Students should always look left, right, then left.

Sometimes they can't see a car, motorcycle, police car or fire truck, but they can hear it.
